NO-FROST REFRIGERATOR-FREEZERS

A Note To You

Thank you for buying a Whirlpool appliance.

You have purchased a quality, *world-class* home appliance. Years of engineering experience have gone into its manufacturing. To ensure that you will enjoy many years of trouble-free operation, we have developed this Use and Care Guide. It is full of valuable information on how to operate and maintain your appliance properly and safely. Please read it carefully. Also, please complete and mail the Ownership Registration Card provided with your appliance. This will help us notify you about any new information on your appliance.

Your safety is important to us.

This guide contains safety symbols and statements. Please pay special attention to these symbols and follow any instructions given. Here is a brief explanation of the use of each symbol.

⚠ WARNING

This symbol will help alert you to such dangers as personal injury, burns, fire and electrical shock.

⚠ CAUTION

This symbol will help you avoid actions which could cause product damage (scratches, dents, etc.) and damage to your personal property.

Help when you need it.

If you ever have a question concerning your appliance's operation, or if you need service, first see "If You Need Assistance Or Service" on page 18. If you need further help, feel free to call an authorized Whirlpool* service company. When calling, you will need to know your appliance's complete model number and serial number. You can find this information on the model and serial number label (see diagram on page 4). For your convenience, we have included a handy place below for you to record these numbers, the purchase date from the sales slip and your dealer's name and telephone number. Keep this book and the sales slip together in a safe place for future reference.

Model Number _____

Dealer Name _____

Serial Number _____

Dealer Phone _____

Purchase Date _____

Important Safety Instructions

⚠ WARNING

To reduce the risk of fire, electrical shock, or injury when using your refrigerator, follow these basic precautions:

- Read all instructions before using the refrigerator.
- Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators are still dangerous ... even if they will "just sit in the garage a few days."
If you are getting rid of your old refrigerator, do it safely.
- Never allow children to operate, play with, or crawl inside the refrigerator.

- Never clean refrigerator parts with flammable fluids. The fumes can create a fire hazard or explosion.

• FOR YOUR SAFETY •

DO NOT STORE OR USE GASOLINE OR OTHER FLAMMABLE VAPORS AND LIQUIDS IN THE VICINITY OF THIS OR ANY OTHER APPLIANCE. THE FUMES CAN CREATE A FIRE HAZARD OR EXPLOSION.

– SAVE THESE INSTRUCTIONS –

Help us help you

Please:

- Install and level the refrigerator on a floor that will hold the weight and in an area suitable for its size and use.
- Do not install the refrigerator near an oven, radiator or other heat source.
- Do not use the refrigerator in an area where the room temperature will fall below 13°C (55°F).
- Keep the refrigerator out of the weather.
- Connect the refrigerator only to the proper kind of outlet, with the correct electrical supply and grounding.
- Do not load the refrigerator with food before it has time to get properly cold.
- Use the refrigerator only for the uses described in this manual.
- Properly maintain the refrigerator.
- Be sure the refrigerator is not used by anyone unable to operate it properly.

Also, remove tape and any inside labels (except the model and serial number label) before using the refrigerator.

To remove any remaining glue:

- Rub briskly with thumb to make a ball, then remove.

OR

- Soak area with liquid hand dishwashing detergent before removing glue as described above. Do not use sharp instruments, rubbing alcohol, flammable fluids or abrasive cleaners. These can damage the material. See "Important Safety Instructions" above.

NOTE: Do not remove any permanent instruction labels inside your refrigerator. Do not remove the Tech Sheet fastened under the refrigerator at the front.

Parts And Features

This section contains captioned illustrations of your appliance. Use them to become familiar with where all parts and features are located and what they look like.

Control panel

Before Using Your Refrigerator

In This Section

Page		Page	
Cleaning it	5	Installing it	5
Plugging it in	5	Leveling it	6

It is important to prepare your refrigerator for use. This section will tell you how to clean it, connect it to a power source, install it and level it.

Cleaning it

Clean your refrigerator before using it, if necessary. See cleaning instructions on page 13.

Plugging it in

Recommended Grounding Method

A 220 or 240 Volt, 50 Hz., AC only 15 or 20 ampere fused and properly grounded electrical supply is required. It is recommended that a separate circuit serving only this appliance be provided. Use a receptacle which cannot be turned off with a switch or pull chain. Do not use an extension cord.

Installing it

1. Allow 1.25 cm (½ inch) space on each side and at the top of the refrigerator for ease of installation.
2. If the refrigerator is to be against a wall, you might want to leave extra space on the hinge side closest to the wall so the door can be opened wider.
3. The refrigerator can be flush against the wall.

Leveling it

Your refrigerator has 2 leveling screws—one on the right and one on the left. To adjust one or both of these, follow the directions below.

1. Remove base grille. (See page 11.)
2. To raise front, turn screw clockwise.
3. To lower front, turn screw counterclockwise.
4. Check with level.
5. Replace base grille. (See page 11.)

Using Your Refrigerator

Removing the meat drawer and cover	10	Saving energy	12

In order to obtain the best possible results from your refrigerator, it is important that you operate it properly. This section will tell you how to do just that.

Setting the controls

Controls for the refrigerator and freezer are in the refrigerator. When the refrigerator is plugged in for the first time:

1. **Set the Refrigerator Control to 3.**
Refrigerator Control adjustments range from 1 (warmest) to 5 (coldest).

2. **Set the Freezer Control to B.**
Freezer Control adjustments range from A (warmest) to C (coldest).
3. Give the refrigerator time to cool down completely before adding food. This may take several hours.

The settings indicated above should be correct for normal, household refrigerator usage. The controls will be set correctly when milk or juice is as cold as you like and when ice cream is firm. If you need to adjust these settings, see "Changing the control settings" on page 8.

NOTE: The Automatic Exterior Moisture control continuously guards against moisture build-up on the outside of your refrigerator cabinet. This control does not have to be set or adjusted.

Changing the control settings

If you need to adjust temperatures in refrigerator or freezer, use the settings listed in the chart below as a guide.

- Adjust the Refrigerator Control first.
- Wait at least 24 hours between adjustments.
- Then adjust the Freezer Control if needed.

CONDITION:	REASON:	RECOMMENDED CONTROL SETTINGS:	
If Refrigerator Section is TOO WARM	Door opened often Large amount of food added Room temperature too warm	Refrigerator Freezer	4 A
If Freezer Section is TOO WARM	Door opened often Large amount of food added Very cold room temperature (can't cycle often enough)	Refrigerator Freezer	3 C
If Refrigerator Section is TOO COLD	Controls not set correctly for your conditions	Refrigerator Freezer	2 B
If ICE isn't MADE FAST ENOUGH	Heavy ice usage Very cold room temperature (can't cycle often enough)	Refrigerator Freezer	3 C
If BOTH SECTIONS are TOO WARM	Door opened often Large amount of food added Very warm or very cold room temperatures	Refrigerator Freezer	4 B

Adjusting the refrigerator shelves

Shelves can be adjusted to match the way you use your refrigerator. Glass shelves are strong enough to hold bottles, milk and other heavy food items.

To remove shelves:

1. Remove items from shelf.
2. Tilt shelf up at front.
3. Lift shelf up at back.
4. Pull shelf straight out.

To replace shelves:

1. Guide the rear hooks into the slots in the shelf supports.
2. Tilt up front of shelf until hooks drop into slots.
3. Lower front of shelf to level position.

Glass shelves are heavy. Be careful.

Removing the freezer shelves

To remove the shelves:

1. Lift right side of shelf off supports.
2. Slide shelf out of shelf support holes.
3. Replace in reverse order.

To adjust the shelves:

1. Remove shelf as above.
2. Remove supports by sliding upward.
3. Replace supports on desired level.
4. Replace shelf.

NOTE: The cup-shaped supports go in the back of the freezer.

Adjusting the shelf glide

The shelf glide can be used to secure odd-shaped items or to separate other items.

1. Grasp glide.
2. Slide guide along track.

NOTE: Shelf glide cannot be removed.

Removing the crisper and crisper cover

To remove the crisper:

1. Slide the crisper straight out to the stop.
2. Lift the front.
3. Slide out the rest of the way.
4. Replace in reverse order.

To remove the cover:

1. Push glass insert up from bottom, then slide out with both hands.
2. Lift front of cover frame.
3. Lift cover frame out by pulling up and out.

To replace the cover:

1. Fit back of cover into notch supports on walls of refrigerator, then lower front into place.
2. Slide back of glass insert into place, then lower front into place.

Removing the meat drawer and cover

To remove the meat drawer:

1. Slide the meat drawer out to the stop.
2. Lift the front.
3. Slide meat drawer out the rest of the way.
4. Replace in reverse order.

To remove the cover:

1. Remove crisper, crisper cover and meat drawer.
2. Tilt front of cover up, lift at back and pull straight out.
3. Replace in reverse order.

Adjusting the meat drawer temperature

Cold air flows against the meat drawer through an opening between the freezer and the refrigerator. This helps keep the meat drawer colder than the rest of the refrigerator for better storage of meats.

Slide the control to let more or less cold air through.

Removing the freezer bin

For proper air movement, keep the freezer bin in place when the refrigerator is operating.

To remove the bin:

1. Slide bin out to the stop.
2. Lift bin at the front to clear the stop.
3. Slide bin out the rest of the way.

To replace the bin:

1. Place bin on the slides.
2. Make sure the stops clear the front of the slides.
3. Slide bin in.

Using the ice cube trays

If cubes are not used, they may shrink. The moving cold air starts a slow evaporation. The longer cubes are stored, the smaller they get.

To remove ice:

1. Hold tray at both ends.
2. Twist slightly.

Removing the base grille

To remove the grille:

1. Open both doors.
2. Pull base grille forward to release the support tabs from the metal clips.
3. **Do not remove Tech Sheet** fastened behind the grille.

To replace the grille:

1. Line up grille support tabs with metal clips.
2. Push firmly to snap into place.
3. Close the doors.

See cleaning instructions for defrost pan and condenser coils on page 14.

Changing the light bulbs

⚠ WARNING

Electrical Shock Hazard

Before removing a light bulb, either unplug the refrigerator or disconnect the electricity leading to it at the main power supply.

Failure to do so could result in personal injury.

To change refrigerator light:

1. Disconnect refrigerator from power supply.
2. Reach behind the Control Console to remove bulb.
3. Replace bulb with a 40-watt appliance bulb.
4. Reconnect refrigerator to power supply.

To change freezer light:

1. Disconnect refrigerator from power supply.
2. Grasp front of light shield.
3. Pull bottom of light shield forward until it snaps free.
4. Replace with a 40-watt appliance bulb.
5. Press light shield straight on until it snaps into place.
6. Reconnect refrigerator to power supply.

NOTE: Not all commercial appliance bulbs will fit your refrigerator. Be sure to replace bulb with one of the same size and shape.

Understanding the sounds you may hear

Your new refrigerator may make sounds that your old one didn't. Because the sounds are new to you, you might be concerned about them. Don't be. Most of the new sounds are normal. Hard surfaces like the floor, walls and cabinets can make the sounds seem louder.

The following describes the kinds of sounds that might be new to you, and what may be making them.

Slight hum, soft hiss

You may hear the refrigerator's fan motor and moving air.

Clicking or snapping sounds

The thermostat makes a definite click when the refrigerator stops running. It also makes a sound when the refrigerator starts. The defrost timer will click when the defrost cycle starts.

Water sounds

When the refrigerator stops running, you may hear gurgling in the tubing for a few minutes after it stops. You may also hear defrost water running into the defrost water pan.

Running sounds

Your refrigerator has a high-efficiency compressor and motor. It will run longer than older designs. It may even seem to run most of the time.

Saving energy

You can help your refrigerator use less electricity.

- Check door gaskets for a tight seal. Level the cabinet to be sure of a good seal.
- Clean the condenser coils regularly.
- Open the door as few times as possible. Think about what you need before you open the door. Get everything out at one time. Keep food organized so you won't have to search for what you want. Close door as soon as food is removed.
- Go ahead and fill up the refrigerator, but don't overcrowd it so air movement is blocked.
- It is a waste of electricity to set the refrigerator and freezer to temperatures colder than they need to be. If ice cream is firm in the freezer and drinks are as cold as your family likes them, that's cold enough.
- Make sure your refrigerator is not next to a heat source such as a range, water heater, furnace, radiator or in direct sunlight.

Caring For Your Refrigerator

In This Section

In This Section		Page		Page
Cleaning your refrigerator	13	Power interruptions	15	
Holiday and moving care	14			

Your refrigerator is built to give you many years of dependable service. However, there are a few things you can do to help extend its product life. This section will tell you how to clean your refrigerator and what to do when going on holiday, moving or during a power outage.

Cleaning your refrigerator

Both the refrigerator and freezer sections defrost automatically. But both should be cleaned about once a month to help prevent odors from building up. Spills should be wiped up right away.

To clean your refrigerator, turn the Refrigerator Control to OFF, unplug it, take out all removable parts and clean the refrigerator according to the following directions.

⚠ WARNING

Personal Injury Hazard

Refrigeration system tubes are located near the defrost pan and can become hot. Remove and install defrost pan carefully.

Failure to do so could result in personal injury.

PART	WHAT TO USE	HOW TO CLEAN
Removable parts (shelves, crisper, etc.)	Sponge or cloth with mild detergent and warm water	• Hand wash, rinse and dry thoroughly.
Outside	Sponge, cloth or paper towel with mild detergent, warm water and an appliance wax (or good auto paste wax)	• Wash outside of cabinet. Do not use abrasive or harsh cleaners. • Rinse and dry thoroughly. • Wax painted metal surfaces at least twice a year. Apply wax with a clean, soft cloth. Waxing painted metal surfaces provides rust protection. Do not wax plastic parts.
Inside walls (freezer should be allowed to warm up so cloth won't stick)	Sponge, soft cloth or paper towel with baking soda or mild detergent and warm water	• Wash with mixture of warm water and – mild detergent, or – baking soda (26 g [2 tablespoons] to 0.95 L [1 quart] of water). • Rinse and dry thoroughly.
Door liners and gaskets	Sponge, soft cloth or paper towel with mild detergent and warm water	• Wash, rinse and dry thoroughly. DO NOT USE cleaning waxes, concentrated detergents, bleaches or cleaners containing petroleum on plastic parts.
Plastic parts (covers and panels)	Soft, clean sponge or soft, clean cloth with mild detergent and warm water	• Wash, rinse and dry thoroughly. DO NOT USE paper towels, window sprays, scouring cleansers or flammable fluids. These can scratch or damage material. See "Important Safety Instructions" on page 3.

continued on next page

CARING FOR YOUR REFRIGERATOR

PART	WHAT TO USE	HOW TO CLEAN
Defrost pan	Sponge or cloth with mild detergent and warm water	• Remove base grille. (See page 11.) • To remove defrost pan, lift pan over wire brace (remove tape; if any). • Wash, rinse and dry thoroughly. • Replace with notched corner to the rear. Push it in all the way. • Make sure defrost pan drain tube is pointing into pan. • Replace base grille.
Condenser coils	Vacuum cleaner with extended narrow attachment	• Remove base grille. • Vacuum coils when dusty or dirty. Coils may need to be cleaned as often as every other month. • Replace base grille.
Floor under refrigerator	Floor cleaners	• Roll refrigerator out away from the wall. • Clean floor. • Roll refrigerator back into place. • Check to see if the refrigerator is level.

Holiday and moving care

Long holidays

Remove all the food if you are going for a month or more. Unplug the refrigerator. Clean it, rinse well and dry. Tape rubber or wood blocks to the tops of both doors to prop them open far enough for air to get in. This will keep odor and mold from building up.

⚠ WARNING

Personal Injury Hazard

Do not allow children to climb on, play near or climb inside the refrigerator when the doors are blocked open.

They may become injured or trapped.

Short holidays

No need to shut off the refrigerator if you will be away for less than four weeks. Use up perishables; freeze other items.

Moving

Remove all food. Pack frozen food in dry ice. Unplug the refrigerator and clean it thoroughly.

Take out all removable parts. Wrap all parts well and tape them together so they don't shift and rattle. Screw in the leveling legs; tape the doors shut; and tape the electric cord to the cabinet.

When you get to your new home, put everything back and refer to page 5.

To restart refrigerator, see "Using Your Refrigerator" on page 7.

Power interruptions

If electricity goes off, call the power company. Ask how long power will be off.

1. If service is to be interrupted 24 hours or less, **keep both doors closed**. This will help foods stay frozen.

2. If service is to be interrupted longer than 24 hours:

(a) Remove all frozen food and store in a frozen food locker.

OR

(b) Place 0.9 kg (2 lbs.) of dry ice in freezer for every cubic foot of freezer space. This will keep food frozen for 2 to 4 days. Wear gloves to protect your hands from dry ice burns.

OR

(c) If neither a food locker or dry ice is available, use or can perishable food at once.

3. A full freezer will stay cold longer than a partly filled one. A freezer full of meat will stay cold longer than a freezer full of baked goods. If food contains ice crystals, it may be safely refrozen, although the quality and flavor may be affected. If the condition of the food is poor or if you feel it is unsafe, dispose of it.

Food Storage Guide

In This Section		Page	Page
Storing fresh food	15	Storing frozen food	16

There is a correct way to package and store refrigerated or frozen food. To keep food fresher, longer, take the time to study these recommended steps.

Storing fresh food

Food placed in the refrigerator should be wrapped or stored in air and moisture proof material. This prevents food odor and taste transfer throughout the refrigerator. For dated products, check code date to ensure freshness.

Leafy vegetables

Remove store wrapping and trim or tear off bruised and discolored areas. Wash in cold water and drain. Place in plastic bag or plastic container and store in crisper.

Vegetables with skins (carrots, peppers)

Store in crisper, plastic bags or plastic container.

Fruit

Wash, let dry and store in refrigerator in plastic bags or crisper. Do not wash or hull berries until they are ready to use. Sort and keep berries in their store container in a crisper, or store in a loosely closed paper bag on a refrigerator shelf.

Eggs

Store without washing in the original carton on interior shelf.

Milk

Wipe milk cartons. For best storage, place milk on interior shelf.

Butter or margarine

Keep opened butter in covered dish or closed compartment. When storing an extra supply, wrap in freezer packaging and freeze.

Cheese

Store in the original wrapping until you are ready to use it. Once opened, rewrap tightly in plastic wrap or aluminum foil.

Leftovers

Cover leftovers with plastic wrap or aluminum foil. Plastic containers with tight lids can also be used.

Meat

Most meat can be stored in original wrapping as long as it is air and moisture proof. Rewrap if necessary. See the following chart for storage times.

TYPE	APPROXIMATE TIME (DAYS) [†]
Chicken	1 to 2
Ground beef	1 to 2
Steaks and roasts	3 to 5
Cured meats	7 to 10
Bacon	5 to 7
Cold cuts	3 to 5
Variety meats	1 to 2

[†]If meat is to be stored longer than the times given, follow the directions for freezing.

NOTE: Fresh fish and shellfish should be used the same day as purchased.

Storing frozen food

The freezer section is designed for storage of commercially frozen food and for freezing food at home. For further information about preparing food for freezing, contact your local Cooperative Extension Service or check a freezer guide or cookbook.

Packaging

The secret of successful freezing is in the packaging. The way you close and seal the package must not allow air or moisture in or out. Packaging done in any other way could cause food odor and taste transfer throughout the refrigerator and drying of frozen food.

Packaging recommended for use:

- Rigid plastic containers with tight-fitting lids
- Straight-sided canning/freezing jars
- Heavy-duty aluminum foil
- Plastic-coated paper
- Non-permeable plastic wraps (made from a saran film)

Follow package or container instructions for proper freezing methods.

Do not use:

- Bread wrappers
- Non-polyethylene plastic containers
- Containers without tight lids
- Waxed paper
- Waxed-coated freezer wrap
- Thin, semi-permeable wrap

The use of these wrappings could cause food odor, taste transfer and drying of frozen food.

Freezing

Do not expect your freezer to quick-freeze any large quantity of food. Put no more unfrozen food into the freezer than will freeze within 24 hours. (No more than 0.9 to 1.4 kg [2 to 3 pounds] of food per cubic foot of freezer space.) Leave enough space for air to circulate around packages. Be careful to leave enough room at the front so the door can close tightly.

Freezer food storage chart

Storage times will vary according to the quality of the food, the type of packaging or wrap used (air and moisture proof) and the storage temperature which should be -17.8°C (0°F).

FOOD	STORAGE TIME
Fruits	
• Citrus	4 to 6 months
• Commercially frozen	12 months
• Juice concentrates	12 months
• Others	8 to 12 months
Vegetables	
• Commercially frozen	8 months
• Home frozen	8 to 12 months
Meats	
• Bacon†	4 weeks or less
• Corned beef†	4 weeks or less
• Frankfurters	1 month
• Ground beef, veal and lamb	2 to 3 months
• Roasts:	
–Beef	6 to 12 months
–Lamb & veal	6 to 9 months
–Pork	4 to 8 months
• Sausage (fresh)	1 to 2 months
• Steaks & chops:	
–Beef	8 to 12 months
–Lamb, veal & pork	3 to 4 months
Fish	
• Alaskan king crab	10 months
• Blue fish & salmon	2 to 3 months
• Breaded fish (purchased)	3 months
• Clams, oysters, cooked fish, crab & scallops	3 to 4 months
• Cod, flounder, sole & haddock	6 months
• Mackerel & perch	2 to 3 months
• Shrimp (uncooked)	12 months
Poultry	
• Chicken or turkey (whole or parts)	12 months
• Cooked (w/ gravy)	6 months
• Duck	6 months
• Giblets	2 to 3 months
• Slices (no gravy)	1 month

FOOD	STORAGE TIME
Main dishes	
• Casseroles (meat, poultry & fish)	2 to 3 months
• Stews	2 to 3 months
• TV dinners	3 to 6 months
Dairy products	
• Butter	6 to 9 months
• Margarine	12 months
• Cheese:††	
–Camembert, Farmer's & Mozzarella	3 months
–Creamed cottage	do not freeze
–Cheddar, Edam, Gouda, Swiss, Brick, etc.	6 to 8 weeks
• Ice cream, ice milk & sherbet	2 months
Eggs	
• Whole (mixed)	12 months
• Whites	12 months
• Yolks	12 months
NOTE: Add sugar or salt to yolks or whole mixed eggs.	
Baked goods	
• Brown 'N Serve rolls (baked)	3 months
• Cakes (frosted)	8 to 12 months
• Cakes (unfrosted)	2 to 4 months
• Cookies (baked)	8 to 12 months
• Cookie dough	3 months
• Fruit cakes	12 months
• Pies (baked)	1 to 2 months
• Pies dough	4 to 6 months
• Quick breads	2 to 3 months
• Unbaked breads	1 month
• Yeast breads & rolls	3 months

†Salting meat shortens freezer life.

††Freezing can change texture of cheese.

If You Need Assistance Or Service

This section is designed to help you save the cost of a service call. Part 1 of this section outlines possible problems, their causes, and actions you can take to solve each problem. Parts 2 and 3 tell you what to do if you still need assistance or service. When calling an authorized Whirlpool® service company for help or calling for service, please provide a detailed description of the problem, your appliance's complete model and serial numbers and the purchase date. (See page 2.) This information will help us respond properly to your request.

1. Before calling for assistance ...

Performance problems often result from little things you can find and fix without tools of any kind. Please check the chart below for problems you can fix. It could save you the cost of a service call.

PROBLEM	POSSIBLE CAUSE	SOLUTION
Your refrigerator will not operate	The power supply cord is not plugged into a live circuit with proper voltage. A household fuse has blown or circuit breaker tripped. The Refrigerator Control is not set correctly.	Firmly plug power cord into a live circuit with proper voltage. (See page 5.) Replace household fuse or reset circuit breaker. Set Refrigerator Control to a numbered setting. (See page 7.)
Unfamiliar sounds or a rattling/jingling noise	There is something on top of or behind the refrigerator. The sounds are normal.	Remove item from on top of or behind the refrigerator. New features on your new refrigerator make new sounds. (See "Understanding the sounds you may hear" on page 12.)
There is water in the defrost pan	This is normal in hot, muggy weather. The pan may even be half full.	Make sure the refrigerator is level so the pan does not overflow.
The lights do not work	A household fuse has blown or circuit breaker tripped. The power supply cord is not plugged into a live circuit with proper voltage. The bulb is burned out.	Replace household fuse or reset circuit breaker. Firmly plug power cord into a live circuit with proper voltage. (See page 5.) Replace bulb. (See page 11.)
The motor seems to run too much	The condenser coils are dirty. It is hot outside or in the room. The door has been opened frequently. A large amount of food has been put in at one time.	Clean the coils. (See page 14.) On hot days, or if the room is too warm, the motor naturally runs longer. Open the door as few times as possible. The motor will run longer in order to cool down the interior when food is added.

Remember:

Motor running time depends on different things: number of door openings, amount of food stored, temperature of the room, setting of controls, etc.

Your new refrigerator may be larger than your old one so it has more space to be cooled. It also has a regular freezer instead of a frozen food compartment. All this means better refrigeration and may require more running time than your old one.

2. If the problem is not due to one of the items listed in Step 1 ...

Contact the dealer from whom you purchased the unit or an authorized Whirlpool® service company.

3. If you need FSP* replacement parts ...

FSP is a protected trademark of Whirlpool Corporation for quality parts. Look for this symbol of quality whenever you need a replacement part for your Whirlpool appliance. FSP replacement parts will fit right and work right, because they are made to the same exacting specifications used to build every new Whirlpool appliance.

To locate FSP replacement parts in your area, contact the dealer from whom you purchased the unit or an authorized Whirlpool® service company.

WHIRLPOOL^{*}

Refrigerator Warranty

LENGTH OF WARRANTY	WHIRLPOOL WILL PAY FOR
FULL ONE-YEAR WARRANTY From Date of Purchase	FSP* replacement parts and repair labor to correct defects in materials or workmanship. Service must be provided by an authorized Whirlpool* service company.
FULL FIVE-YEAR WARRANTY From Date of Purchase	FSP replacement parts and repair labor to correct defects in materials or workmanship in the sealed refrigeration system. These parts are: 1. Compressor 2. Evaporator 3. Condenser 4. Drier 5. Connecting tubing Service must be provided by an authorized Whirlpool* service company.
WHIRLPOOL WILL NOT PAY FOR	
A. Service calls to: 1. Correct the installation of the refrigerator. 2. Instruct you how to use the refrigerator. 3. Replace house fuses or correct house wiring or plumbing. 4. Replace light bulbs. B. Repairs when refrigerator is used in other than normal, single-family household use. C. Pickup and delivery. This product is designed to be repaired in the home. D. Damage to refrigerator caused by accident, misuse, fire, flood, acts of God or use of products not approved by Whirlpool. E. Any food loss due to product failure. F. Repairs to parts or systems caused by unauthorized modifications made to the appliance.	

8-92

WHIRLPOOL CORPORATION SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Outside the United States, a different warranty may apply. For details, please contact your authorized Whirlpool distributor or military exchange.
