Important safety instructions

WARNING: To reduce the risk of fire, electric shock, or injury to persons when using your dryer, follow basic precautions, including the following:

Read these laundry instructions carefully for important use and safety information before using your dryer.

NEVER dry items cleaned, washed, soaked in or spotted with wax, paint, gasoline, or flammable fluids in the dryer. The fumes can create a **FIRE HAZARD** or **EXPLOSION**. **ALWAYS** hand launder and air dry fabrics containing these materials.

NEVER allow children to operate, play with, or crawl inside the dryer. Close supervision of children is necessary when the dryer is used near children.

When discarding an old dryer, **ALWAYS** remove the door to prevent accidental entrapment.

DO NOT reach into a dryer if the drum is moving.

DO NOT install or store dryer where it will be exposed to the weather.

DO NOT tamper with the controls.

Dryer must be electrically grounded. See the "Installation Instructions."

You are personally responsible for making sure that your dryer is installed, repaired and parts replaced by a qualified person.

Use only fabric softeners specifically labeled as not being harmful to the dryer. **FIRE HAZARD and DAMAGE** to materials can result from:

- drying rubber, rubber-like and heat sensitive materials with heat.
- allowing lint build-up inside the dryer or exhaust system – cleaning should be done periodically by a qualified person.

Clean lint screen before or after each load.

DO NOT let dust, lint, paper, rags, chemicals, etc. pile up around or under the dryer.

• **SAVE THESE INSTRUCTIONS** •

Additional Safety Instructions and Your Responsibilities

NEVER operate the dryer if...

- it is not working right (i.e. noisy, too hot).
- it is damaged.
- parts are missing (i.e. door latch).
- all panels are not in place.
- the lint screen is loose, damaged or missing.

FOR YOUR SAFETY

If you smell gas:

- 1. Open windows.**
- 2. Don't touch electrical switches.**
- 3. Extinguish any open flame.**
- 4. Immediately call your gas supplier.**

ALWAYS shut off the gas valve before leaving on vacation.

ALWAYS unplug the power supply cord or turn off electrical power before attempting to service the dryer. Shut off **GAS VALVE** if yours is a gas dryer.

You are personally responsible for making sure that your dryer...

- is properly maintained.
- is properly installed and leveled in a well ventilated room* on a floor that can support the weight.
- is located in an area where the temperature is above 45°F (7.2°C).
- is connected to the proper outlet and electrical supply.*
- is properly connected to fuel and exhaust systems.*
- is not installed against drapes or curtains.*
- is used only for jobs normally expected of home clothes dryers.
- is not used by children or anyone unable to operate it properly.

*See "Installation Instructions" for complete information.

FOR YOUR SAFETY

Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

Operating instructions

Starting Your Dryer

Before starting your dryer, be sure laundry is sorted and loaded properly (see your "Dryer Guide"). **Be sure the door is tightly closed.**

1. Select CYCLE and TIME

Turn the Control Knob either way to point to the time setting you want in the cycle you want.

2. Push the START Button

The dryer will start tumbling when you push the START Button.

3. To stop and restart the dryer

To stop, open the door (or turn the Control Knob to OFF).

To restart, close the door and push START.

4. To change the setting

The setting can be changed at any time by turning the Control Knob to a new setting.

The Cycle Control Knob should point to an OFF area when the dryer is not in use. If the dryer is stopped before the cycle is finished, turn the Cycle Control Knob to an OFF area.

Selecting a Cycle

Each dryer cycle is designed to dry certain kinds of fabrics. Use the chart below to help you decide which cycle to use.

TYPE OF LOAD	SUGGESTED CYCLE
COTTONS	
HEAVY – Bedspreads, mattress pads, quilts	HEAT
MEDIUM AND LIGHTWEIGHT – Shirts, dresses, sheets, diapers, towels, work clothes	HEAT
PERMANENT PRESS	
HEAVY – Work clothes, jackets, raincoats, etc.	HEAT
MEDIUMWEIGHT – Shirts, uniforms, dresses, slacks, etc.	HEAT
KNITS	
HEAVYWEIGHT – COTTONS, RAYONS, BLENDS – T-Shirts, slacks, polo shirts, etc.	HEAT
LIGHTWEIGHT – SYNTHETIC FIBERS (polyester, acrylic, etc.) AND BLENDS – Lingerie, blouses, dresses, etc.	HEAT
DELICATELY CONSTRUCTED FABRICS –	
Sheer Curtains (2 or 3 panels)	HEAT
RUBBER, PLASTIC, HEAT SENSITIVE MATERIALS	
Foam pillows, bras, etc.	AIR
Plastic shower curtains, tablecloths	AIR
Rubber backed rugs	AIR
Olefin, polypropylene, sheer nylon	AIR

WARNING: Drying these and other heat-sensitive materials with heat can damage them or be a FIRE HAZARD.

The last 5 minutes of the HEAT Cycle are without heat. This helps cool down the load for easier handling and to reduce wrinkling.

Drying tips

Drying times

Drying times will vary depending on:

- amount of moisture in the clothes.
- type and weight of the fabric.
- size of the load.
- room temperature around the dryer.
- temperature of the wash/rinse water.
- amount of lint in the lint screen.

See your "Dryer Guide" for more information.

Mixed loads

When drying a load with different kinds and weights of fabrics, use the cycle suggested for the lightest fabrics. When the dryer stops, remove dry items and reset the control.

To help reduce wrinkling, take the load from the dryer **as soon as tumbling stops**. This is very important for permanent press, knits and other synthetic fabrics.

DO NOT OVERDRY. Overdrying can cause shrinkage, static cling, and can damage some fabrics.

Lint screen

Clean the lint screen before each load. A screen blocked by lint can increase drying time and may be a FIRE HAZARD.

Open the lid and pull the lint screen straight out.

ROLL the lint off the screen with your fingers.

DO NOT rinse or wash the screen. Push the screen firmly back into place.

WARNING: DO NOT run the dryer with the lint screen loose, damaged, blocked or missing. Doing so can cause overheating, damage fabrics and be a **FIRE HAZARD**.

Lint removal

Lint can gather inside the dryer and create a **FIRE HAZARD**. This lint should be removed at least every 2 to 3 years, or more often, depending on dryer usage.

ELECTRIC DRYERS

GAS DRYERS

Cleaning should be done only by a qualified person.

WARNING:

- Avoid electrical shock hazard – unplug power supply cord or turn off electrical power.
- Avoid injury or damage – do not put hands inside cabinet.
- Make sure dryer is cool.

1. Remove back panel (electric) or lower access panel (gas).
2. Avoid damaging wires, thermostats, funnel or igniter.
3. Remove lint from shaded area – see art – with a soft brush or vacuum cleaner.
4. Replace panel; reconnect and re-level dryer.

Caring for your dryer

Remove loose and sharp objects from pockets and cuffs before drying – pins, buckles, etc. **Close metal zippers.**

Wipe off all spills with a damp, soft cloth. Spills allowed to remain may dull or damage the finish.

Never leave wet or damp laundry in your dryer.

Sharp or heavy objects should never be put on or in the dryer. Check pockets for bolts, nuts etc.

Some pretreatment products can damage dials, consoles and finish. Do not use these products on or near your dryer.

Cleaning dryer interior

WARNING: Before cleaning interior, unplug power supply cord or, turn off electrical power to avoid electrical shock hazard.

Garments which contain unstable dyes, such as denim blue jeans or brightly colored cotton items, may discolor the dryer interior. If the interior is discolored, clean with one of the following methods to avoid staining later load items.

Powdered laundry detergent and very warm water

Make a paste with detergent and very warm water. Apply paste to a soft cloth and scrub area until all excess dye is removed. Wipe thoroughly with a damp cloth.

Tumble a load of rags. –OR–

Liquid spray household cleaner

Spray on stained area. Rub with a cloth until all excess dye is removed. Tumble a load of rags.

Vacation care

- Unplug power cord or turn off electrical power.
- For gas dryers, close gas valve.
- Clean lint screen.

If you need service or assistance, we suggest you follow these five steps:

1. Before calling for assistance...

Performance problems often result from little things you can find and fix yourself without tools of any kind.

IF YOUR DRYER DOES NOT RUN:

- Is the power supply plugged into a live circuit with the proper voltage?
- Is the door closed tightly?
- Did you push the START Button?

- Have you checked your home's main fuses or circuit breaker box?

IF YOUR DRYER DOES NOT HEAT:

- The AIR setting is without heat.

- Is the gas turned on? If not, turn the Control Knob to OFF. Turn on gas. Wait 5 minutes. Reset controls and start.
- An electric dryer uses a circuit breaker or 2 fuses. If one fuse is blown, the dryer may run, but not heat.

IF DRYING TIME SEEMS LONG:

- Is the lint screen clean? See page 7 of this book for cleaning instructions.
- See page 6 of this book and your "Dryer Guide."

2. If you need assistance*... 4. If you have a problem*...

Call Whirlpool COOL-LINE® service assistance telephone number. Dial free from anywhere in the U.S.:
1-800-253-1301

and talk with one of our trained Consultants. The Consultant can instruct you in how to obtain satisfactory operation from your appliance or, if service is necessary, recommend a qualified service company in your area.

Call our COOL-LINE service assistance telephone number (see Step 2) and talk with one of our Consultants, or if you prefer, write to:

Mr. Robert Stanley
Division Vice President
Whirlpool Corporation
2000 M-63
Benton Harbor, MI 49022

3. If you need service*...

Whirlpool has a nationwide network of franchised TECH-CARE® Service Companies. TECH-CARE service

technicians are trained to fulfill the product warranty and provide after-warranty service, anywhere in the United States. To locate TECH-CARE service in your area, call our COOL-LINE service assistance telephone number (see Step 2) or look in your telephone directory Yellow Pages under:

5. If you need FSP® replacement parts*...

FSP is a registered trademark of Whirlpool Corporation for quality parts. Look for this symbol of quality whenever you need a replacement part for your Whirlpool appliance. FSP replacement parts will fit right and work right, because they are made to the same exacting specifications used to build every new Whirlpool appliance.

*If you must call or write, please provide: model number, serial number, date of purchase, and a complete description of the problem. This information is needed in order to better respond to your request for assistance.

Notes

[illegible]

WHIRLPOOL[®] DRYER WARRANTY

DR001

LENGTH OF WARRANTY	WHIRLPOOL WILL PAY FOR
FULL ONE-YEAR WARRANTY From Date of Purchase	FSP [®] replacement parts and repair labor to correct defects in materials or workmanship. Service must be provided by a franchised TECH-CARE [®] service company.
WHIRLPOOL WILL NOT PAY FOR	
A. Service calls to: 1. Correct the installation of the dryer. 2. Instruct you how to use the dryer. 3. Replace house fuses or correct house wiring or plumbing. 4. Replace light bulbs. B. Repairs when dryer is used in other than normal, single-family household use. C. Pick up and delivery. This product is designed to be repaired in the home. D. Damage to dryer caused by accident, misuse, fire, flood, acts of God or use of products not approved by Whirlpool.	

WHIRLPOOL CORPORATION SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages so this limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Outside the United States, a different warranty may apply. For details, please contact your franchised Whirlpool distributor or military exchange.
