## DRYER SAFETY

### Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING."

These words mean:

**⚠ DANGER**

You can be killed or seriously injured if you don't immediately follow instructions.

**⚠ WARNING**

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

## IMPORTANT SAFETY INSTRUCTIONS

**WARNING:** To reduce the risk of fire, electric shock, or injury to persons when using the dryer, follow basic precautions, including the following:

- Read all instructions before using the dryer. 
- Keep a minimum clearance of 10 cm (4 in.) between the rear of the dryer and any wall.
- The operation of this appliance may affect the operation of other types of appliances which take their air supply for safe combustion from the same room. There has to be adequate ventilation to replace exhausted air and thus avoid the back-flow of gases into the room from appliances burning other fuels, including open fires, when operating the tumble dryer. If in doubt, consult the appliance manufacturers.
- Do not obstruct the air supply to the dryer (see Installation Instructions for minimum clearances).
- Do not place items exposed to cooking oils in your dryer. Oil-affected items can ignite spontaneously, especially when exposed to heat sources such as in a tumble dryer. The items become warm causing an oxidation reaction in the oil. Oxidation creates heat. If the heat cannot escape, the items can become hot enough to catch fire. Piling, stacking or storing oil-affected items can prevent heat from escaping and so create a fire hazard.
- If it is unavoidable to dry in the dryer items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers, or that have been contaminated by hair care products, should be washed in hot water with an extra amount of detergent before being dried in the dryer. These items may give off vapours that could ignite or explode. Such washing will reduce, but not eliminate, the hazard.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instructions concerning use of the appliance by persons responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- The dryer should not be used if industrial chemicals have been used for cleaning.
- Before the dryer is removed from service or discarded, remove the doors to the drying compartment.
- Do not reach into the dryer if the drum is moving. A door switch is fitted for your safety.
- Do not install or store the dryer where it will be exposed to the weather.
- Do not tamper with controls.
- Do not continue to use this appliance if it appears to be faulty.
- Do not repair or replace any part of the dryer or attempt any maintenance unless specifically recommended in this Use and Care Guide. Repairs and servicing should only be carried out by competent service personnel.
- Do not use fabric softeners or products to eliminate static unless recommended by the manufacturer of the fabric softener or product. Follow their instructions.
- Clean dryer lint screen before or after each load. Do not operate dryer without lint screen in place.
- Keep area around the exhaust and inlet openings and adjacent surrounding areas free from the accumulation of lint, dust, and dirt.
- The interior of the dryer and exhaust vent should be cleaned periodically by qualified service personnel.
- See Installation Instructions for earthing instructions.
- Do not dry unwashed items in this dryer.
- Items such as foam rubber (latex foam), shower caps, waterproof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should only be dried using the No Heat Fluff cycle.
- The final part of a tumble dryer cycle occurs without heat (cool down cycle) to ensure that the items are left at a temperature that ensures the items will not be damaged.

**WARNING:** Never stop a tumble dryer cycle before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.

**SAVE THESE INSTRUCTIONS**

---

# DRYER DISPOSAL

This appliance is marked according to the European directive 2002/ 96/ EC on Waste Electrical and Electronic Equipment (WEEE).

By ensuring this product is disposed of correctly, you will help avoid potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

The symbol on the product, or on the documents accompanying the product, indicates that this appliance may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment.

Disposal must be carried out in accordance with local environmental regulations for waste disposal.

For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

# PARTS AND FEATURES

- A. Control panel
- B. Model and serial number label
- C. Dryer drum
- D. Lint screen
- E. Wide-opening door

**Additional features your dryer may have**  
 End of Cycle Signal selector  
 Wrinkle Shield selector  
 Automatic Dry sensor

**Technical Specifications**  
 (See rating plate in door opening for full model details)

220-240V ~ 50Hz, 1ph  
 3100W, IPX4  
 Clothes capacity: 9.0 kg (19.8 lbs) max.

## Control Panel

## Checking Your Vent

Your dryer must be properly installed and vented to achieve maximum drying efficiency and shorten drying times. Use the minimum recommended installation clearances found in the Installation Instructions. See the Installation Instructions for more information.

**! WARNING**

**Fire Hazard**

**Use a heavy metal vent.**

**Do not use a plastic vent.**

**Do not use a metal foil vent.**

**Failure to follow these instructions can result in death or fire.**

If the dryer is not properly installed and vented, it will not be covered under the warranty. Proper venting of your dryer is important for satisfactory drying results. See the Installation Instructions for more detail.

**NOTE:** Service calls caused by improper venting will be paid for by the customer, whether it was a paid installation or self-installed.

1. Do not use plastic vent or metal foil vent. Use 10.2 cm (4") metal or flexible metal vent. Do not kink or crush flexible metal vent. It must be completely extended to allow adequate exhaust air to flow. Check vent after installation. Refer to the Installation Instructions for proper length requirements of vent.

2. Use a 10.2 cm (4") exhaust hood.
3. Use the straightest path possible when routing the vent.

*Good*

*Better*

4. Use clamps to seal all joints. Do not use duct tape, screws or other fastening devices that extend into the interior of the vent to secure vent.
5. Clean exhaust vent periodically, depending on use, but at least every 2 years, or when installing your dryer in a new location. When cleaning is complete, be sure to follow the Installation Instructions supplied with your dryer for final product check.

---

# DRYER USE

---

## Starting Your Dryer

### **WARNING**

#### Explosion Hazard

Keep flammable materials and vapors, such as petrol, away from dryer.

Do not dry anything that has ever had anything flammable on it (even after washing).

Failure to follow these instructions can result in death, explosion, or fire.

### **WARNING**

#### Fire Hazard

No washer can completely remove oil.

Do not dry anything that has ever had any type of oil on it (including cooking oils).

Items containing foam, rubber, or plastic must be dried on a clothesline or by using a No Heat Fluff cycle.

Failure to follow these instructions can result in death or fire.

---

**WARNING:** To reduce the risk of fire, electric shock, or injury to persons, read the IMPORTANT SAFETY INSTRUCTIONS before operating this appliance.

This booklet covers several different models. Your dryer may not have all of the cycles and features described.

Before using your dryer, wipe the dryer drum with a damp cloth to remove dust from storing and shipping.

1. Clean lint screen before each load. See "Cleaning the Lint Screen."
2. Load clothes loosely into the dryer and close the door. Do not pack the dryer. Allow space for clothes to tumble freely.
3. Turn the Cycle Control knob to the recommended cycle for the type of load being dried. Use the Energy Preferred Automatic Setting (\*) to dry most heavy to medium-weight fabrics.
4. If your dryer has a Temperature selector, set it to the recommended setting for the type of fabric being dried. See "Drying, Cycle and Temperature Tips."
5. (OPTIONAL) Your dryer may have an End of Cycle Signal. The signal is helpful when drying items that should be removed from the dryer as soon as it stops.  
The End of Cycle signal is part of the Start button and is selectable. Turn the Start button to ON or OFF. The signal will sound only if the selector is set to On.
6. If desired, add fabric softener sheet. Follow package instructions.
7. Press the Start button.

## Stopping and Restarting

You can stop your dryer anytime during a cycle.

### To stop your dryer

Open the dryer door or turn the Cycle Control knob to OFF.

**NOTE:** The Cycle Control knob should point to an Off area when the dryer is not in use.

### To restart your dryer

Close the door. Select a new cycle and temperature (if desired). Press the Start button.

---

## Drying, Cycle and Temperature Tips

Select the correct cycle and temperature for your load.

Cool Down tumbles the load without heat during the last few minutes of all cycles to make the load easier to handle.

### Drying tips

- Follow care label directions when they are available.
- If desired, add a fabric softener sheet. Follow package instructions.
- Remove the load from the dryer as soon as tumbling stops, to reduce wrinkling. This is especially important for permanent press, knits and synthetic fabrics.

## Cycle and temperature tips

- Dry most loads using the Energy Preferred setting, if available on your dryer.
- Use a High heat setting for drying heavyweight items such as towels and work clothes.
- Use a Medium heat setting for drying medium-weight items such as sheets, underwear, permanent press fabrics and some knits.
- Use a Low heat setting for drying lightweight items such as lingerie, blouses, dresses and some knits.
- Use the No Heat Fluff setting for rubber, plastic or heat-sensitive fabrics.
- Line dry bonded or laminated fabrics.

**NOTE:** If you have questions about drying temperatures for various loads, refer to the care label directions. If you are unsure of the temperature to select for a load, select a lower setting rather than a higher setting.

## Cycles

This manual covers several different models. Your dryer may vary from the model shown and may not have all of the cycles and features described.

### Auto Sense Dry Cycle

Use your Auto Sense Dry cycle to dry most loads. Your dryer has a control that senses the moisture level in the load and shuts off when the load reaches the selected dryness. Select the temperature from the temperature selector based on the fabrics in your load.

After drying a load in the Auto Sense Dry cycle, check the dryness.

If the load is drier than you like, select a setting closer to Less Dry the next time you dry a similar load.

If a load is not as dry as you like, complete drying using a timed cycle. Select a setting closer to Very Dry the next time you dry a similar load.

**NOTE:** Drying time varies with an Auto Sense Dry cycle. The type of fabric, the size of the load, and the dryness selected affect drying time. See “Drying, Cycle, and Temperature Tips.”

### Timed Dry cycle(s)

Select the correct Timed Dry setting and temperature for your load.

Use a longer Timed Dry setting for heavyweight and bulky items, such as bedspreads and work clothes, or large loads that require a long drying time. Set the temperature selector to High Heat.

Use a shorter Timed Dry setting for lightweight items such as lingerie or knits. Set the temperature selector based on the fabrics in your load.

### No Heat Fluff cycles

Use the No Heat Fluff cycle for items that require drying without heat such as rubber, plastic or heat-sensitive fabrics. Set the Cycle Control knob to No Heat Fluff. This chart shows examples of items that can be dried using the No Heat Fluff cycle.

Type of Load	No Heat Fluff cycle*
Foam rubber—pillows, padded bras, stuffed toys	20 - 30
Plastic—Shower curtains, tablecloths	20 - 30
Rubber-backed rugs	40 - 50
Olefin, polypropylene, sheer nylon	10 - 20

\*(Minutes). Reset cycle to complete drying if needed.

### When using No Heat Fluff

- Check that coverings are securely stitched.
- Shake and fluff pillows by hand periodically during cycle.
- Dry item completely. Foam rubber pillows are slow to dry.

## Additional Features

This manual covers several different models. Your dryer may not have all of the features described.

### Wrinkle Free setting

Select this cycle to help remove wrinkles from items such as clothing packed in a suitcase or items wrinkled from being left in the dryer too long. Set the Temperature selector, if available, to Medium or Low Heat depending on the fabrics in your load.

### Damp Dry

Select this cycle to dry items to a damp level, or to dry items that do not require an entire drying cycle. Use the Damp Dry cycle on items such as jeans (to avoid stiffness) or cotton clothing (to make pressing easier). If your model has a Temperature selector, choose a temperature setting based on the fabrics in your load.

### End of Cycle Signal

The End of Cycle signal sounds when a cycle is complete. If your End of Cycle signal is selectable, the signal will sound only if set to On.

## Drying Rack (optional)

The drying rack is useful for machine drying items you would not necessarily want to tumble dry or that you would normally line dry (for example, tennis shoes, pillows, stuffed toys).

You can order a drying rack by contacting the dealer from whom you purchased your dryer.

### To use the drying rack

1. Slide rear pegs into the dimples on the back wall of the dryer. Lower the front legs to rest on the dryer opening.

2. Put the wet items on top of the drying rack. Leave space between the items so air can reach all the surfaces. Close the door.

**NOTE:** Do not allow items to hang over the edge of the drying rack.

3. Select cycle and temperature to match the fabrics in your load. Items containing foam, rubber or plastic must be dried on a clothesline or by using an air cycle. Refer to the following table.
4. Press Start. Reset cycle to complete drying, if needed.

**NOTE:** The drying rack must be removed for normal tumbling. Do not use the automatic cycle with the drying rack.

Rack Dry	Cycle	Temp	Time*
<b>Wool Sweaters</b> Block to shape and lay flat on the drying rack	Timed	Low	60
<b>Stuffed toys or pillows</b> Cotton or polyester fiber filled	Timed	Low	60
<b>Stuffed toys or pillows</b> Foam rubber filled	Air (no heat)	None	90
<b>Sneakers or canvas shoes</b>	Air (no heat)	None	90

\*(Minutes). Reset cycle to complete drying if needed.

## DRYER CARE

### Cleaning the Dryer Location

Keep dryer area clear and free from items that would obstruct the flow of combustion and ventilation air.

### **! WARNING**

#### Explosion Hazard

Keep flammable materials and vapors, such as petrol, away from dryer.

Place dryer at least 46 cm (18 inches) above the floor for a garage installation.

Failure to do so can result in death, explosion, or fire.

### Cleaning the Lint Screen

#### Every load cleaning

The lint screen is located in the door of the dryer. Clean the lint screen before each load. A screen blocked by lint can increase drying time.

#### To clean

1. Pull the lint screen toward you. Roll lint off the screen with your fingers. Do not rinse or wash screen to remove lint. Wet lint is hard to remove.

2. Push the lint screen firmly back into place.

#### IMPORTANT:

- Do not run the dryer with the lint screen loose, damaged, blocked, or missing. Doing so can cause overheating and damage to both the dryer and fabrics.
- If lint falls off the screen into the dryer during removal, check the exhaust hood and remove the lint. See "Checking Your Vent."

## As needed cleaning

Laundry detergent and fabric softener residue can build up on the lint screen. This buildup can cause longer drying times for your clothes, or cause the dryer to stop before your load is completely dry. The screen is probably clogged if lint falls off the screen.

Clean the lint screen with a nylon brush every 6 months, or more frequently if it becomes clogged due to a residue buildup.

### To wash

1. Roll lint off filter using your fingers.
2. Wet both sides of lint screen with hot water.
3. Wet a nylon brush with hot water and liquid detergent. Scrub lint screen with the brush to remove residue buildup.

4. Rinse screen with hot water.
5. Thoroughly dry lint screen with a clean towel. Insert lint screen back into dryer.

## Cleaning the Dryer Interior

1. Apply a liquid, nonflammable household cleaner to the stained area of the drum and rub with a soft cloth until stain is removed.
2. Wipe drum thoroughly with a damp cloth.
3. Tumble a load of clean cloths or towels to dry the drum.

**NOTE:** Garments that contain unstable dyes, such as denim blue jeans or brightly colored cotton items, may discolor the dryer interior. These stains are not harmful to your dryer and will not stain future loads of clothes. Dry unstable dye items inside out to avoid transfer of dye.

## Removing Accumulated Lint

### From Inside the Dryer Cabinet

Lint should be removed every 2 years, or more often, depending on dryer usage. Cleaning should be done by a qualified person.

### From Inside the Exhaust Vent

Lint should be removed every 2 years, or more often, depending on dryer usage.

## Vacation and Moving Care

### Vacation care

Operate your dryer only when you are at home. If you will be on vacation or not using your dryer for an extended period of time, you should:

1. Disconnect power.
2. Clean lint screen. See “Cleaning the Lint Screen.”

### Moving care

1. Check with a licensed electrician to confirm that supply voltage at new home matches voltage specified on the model/serial rating plate.

## ⚠ WARNING

### Electric Shock Hazard

**Disconnect power before servicing.**

**Replace all parts and panels before operating.**

**Failure to do so can result in death or electric shock.**

2. Disconnect power.
3. Disconnect wiring.
4. Make sure leveling legs are secure in dryer base.
5. Use masking tape to secure dryer door.

# TROUBLESHOOTING

First try the solutions suggested here and possibly avoid the cost of a service call...

## Dryer Operation

### Dryer will not run

- **Has a household fuse blown, or has a circuit breaker tripped?**  
Check that the fuse is intact and tight, or that a circuit breaker has not tripped. Replace the fuse or reset the circuit breaker. If the problem continues, contact a qualified electrician.
- **Is the correct power supply available?**  
Electric dryers require 220-240 volt power supply. Check with a qualified electrician.
- **Was a regular fuse used?**  
Use a time-delay fuse.
- **Is the dryer door firmly closed?**
- **Was the Start button firmly pressed?**

### No heat

- **Has a household fuse blown, or has a circuit breaker tripped?**  
Check that the fuse is intact and tight, or that a circuit breaker has not tripped. Replace the fuse or reset the circuit breaker. If the problem continues, contact a qualified electrician.

### Unusual sounds

- **Has the dryer had a period of non-use?**  
If the dryer hasn't been used for a while, there may be a thumping sound during the first few minutes of operation.
- **Is a coin, button, or paper clip caught between the drum and front or rear of the dryer?**  
Check the front and rear edges of the drum for small objects. Clean out pockets before laundering.
- **Are the four legs installed, and is the dryer level front to back and side to side?**  
The dryer may vibrate if not properly installed. See the Installation Instructions.
- **Is the clothing knotted or balled up?**  
When balled up, the load will bounce, causing the dryer to vibrate. Separate the load items and restart the dryer.

### Timer does not noticeably advance

- **Is the dryer set to Timed Dry or No Heat Fluff?**  
The timer moves slowly and continuously for the time setting.
- **Is the dryer set to Auto Sense Dry?**  
The timer moves only when the clothing is mostly dry.

## Dryer Results

### Clothes are not drying satisfactorily, drying times are too long, or load is too hot

- **Is the lint screen clogged with lint?**  
Lint screen should be cleaned before each load.

## ! WARNING

### Fire Hazard

- Use a heavy metal vent.
- Do not use a plastic vent.
- Do not use a metal foil vent.
- Failure to follow these instructions can result in death or fire.

- **Is the exhaust vent or outside exhaust hood clogged with lint, restricting air movement?**  
Run the dryer for 5-10 minutes. Hold your hand under the outside exhaust hood to check air movement. If you do not feel air movement, clean exhaust system of lint or replace exhaust vent with heavy metal or flexible metal vent. See the Installation Instructions.
- **Are fabric softener sheets blocking the grille?**  
Use only one fabric softener sheet, and use it only once.
- **Is the exhaust vent the correct length?**  
Check that the exhaust vent is not too long or has too many turns. Long venting will increase drying times. See the Installation Instructions.
- **Is the exhaust vent diameter the correct size?**  
Use 10.2 cm (4") diameter vent material.

## **⚠ WARNING**

### **Explosion Hazard**

Keep flammable materials and vapors, such as petrol, away from dryer.

Place dryer at least 46 cm (18 inches) above the floor for a garage installation.

Failure to do so can result in death, explosion, or fire.

- **Is the dryer located in a room with temperature below 7°C (45°F)?**  
Proper operation of dryer cycles requires temperatures above 7°C (45°F).
- **Is the dryer located in a closet?**  
Closet doors must have ventilation openings at the top and bottom of the door. The sides of the dryer require a minimum of 2.5 cm (1") of airspace, and the rear of the dryer requires 12.7 cm (5"). See the Installation Instructions.
- **Has an air dry cycle been selected?**  
Select the right cycle for the types of garments being dried.
- **Is the load too large and heavy to dry quickly?**  
Separate the load to tumble freely.

### **Cycle time too short**

- **Is the automatic cycle ending early?**  
Change the dryness level setting on Automatic Cycles. Increasing or decreasing the dryness level will change the amount of drying time in a cycle.

### **Lint on load**

- **Is the lint screen clogged?**  
Lint screen should be cleaned before each load.

### **Stains on load or drum**

- **Was dryer fabric softener properly used?**  
Add dryer fabric softener sheets at the beginning of the cycle. Fabric softener sheets added to a partially dried load can stain your garments.  
  
Drum stains are caused by dyes in clothing (usually blue jeans). This will not transfer to other clothing.

### **Loads are wrinkled**

- **Was the load removed from dryer at the end of the cycle?**
- **Was the dryer overloaded?**  
Dry smaller loads that can tumble freely.

### **Odors**

- **Have you recently been painting, staining or varnishing in the area where your dryer is located?**  
If so, ventilate the area. When the odors or fumes are gone from the area, rewash and dry the clothing.
- **Is the electric dryer being used for the first time?**  
The new electric heating element may have an odor. The odor will be gone after the first cycle.

## **ASSISTANCE OR SERVICE**

Before calling for assistance or service, please check the "Troubleshooting" section. It may save you the cost of a service call. If you still need help, contact the dealer from whom you purchased the dryer, or a Maytag designated service company.

When calling, please know the purchase date and the complete model and serial number of your appliance. This information will help us to better respond to your request.
